

Cloud Switch Installation

Requirements

- Debian Version 8 or higher
- Cloud Switch Debian Package

Download Debian Package

Download the Debian package to the server and install the package.

Start Installation

For 32-bit systems:

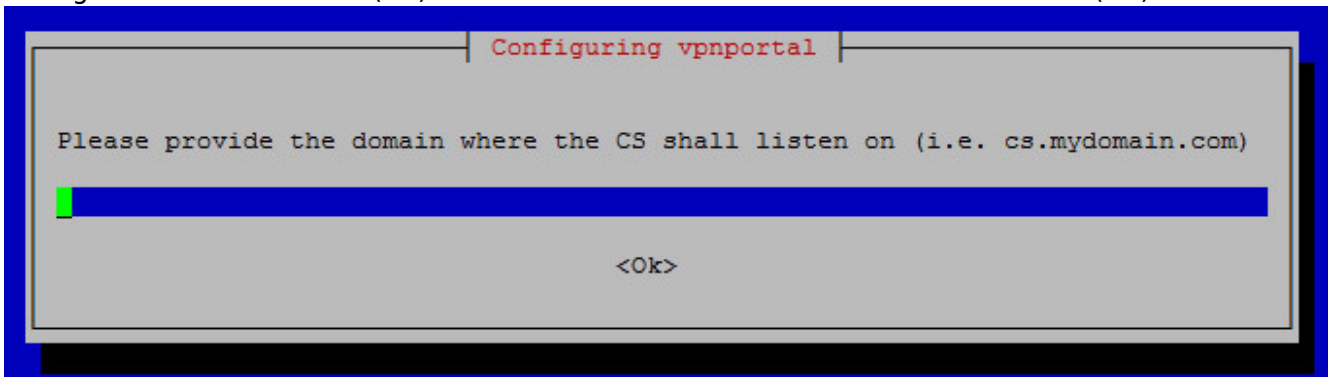

```
$ sudo dpkg -i vpnportal_1.1-201609061733_i386.deb
$ sudo apt-get -f install
```

For 64-bit systems:

```
$ sudo dpkg -i vpnportal_1.1-201609231053_amd64.deb
$ sudo apt-get -f install
```

Configuration

1. Configure the Cloud Switch (CS) Domain. Must be different from the Cloud Router (CR).

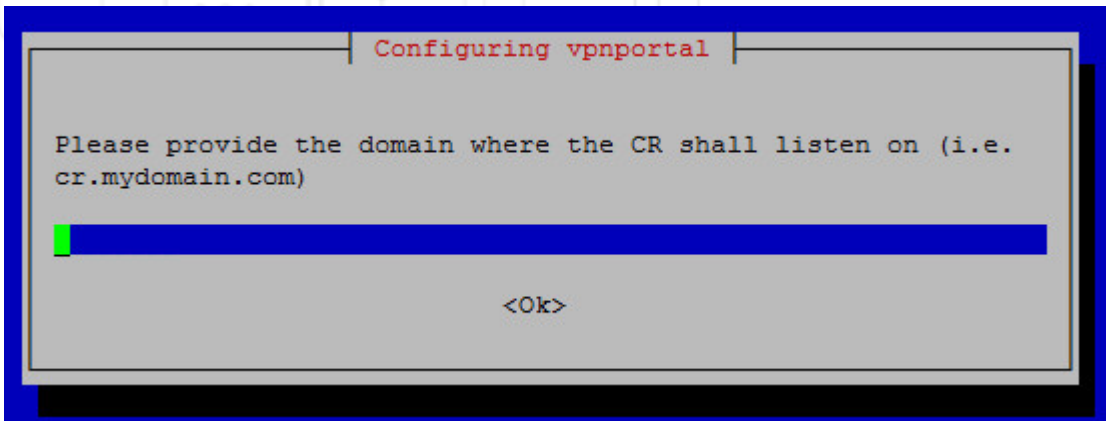

2. Configure the Cloud Router (CR) Domain.

NetModule AG

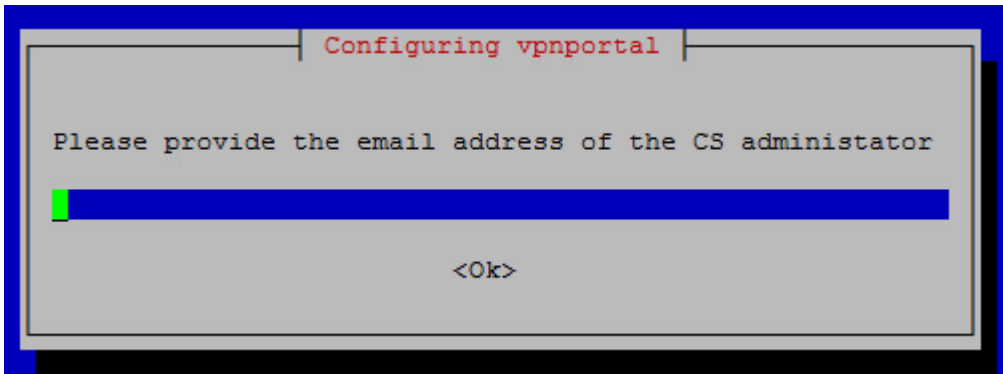

Meriedweg 11 T +41 31 985 25 10 Switzerland
3172 Niederwangen F +41 31 985 25 11

NetModule GmbH

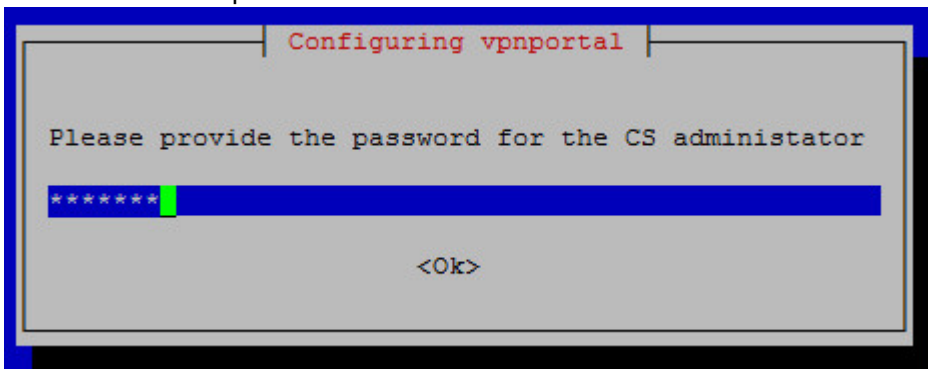

Frankfurter Strasse 92 T +49 6196 77 99 79 0 Germany
65760 Eschborn F +49 6196 77 99 79 9

3. Set the CS administrator account name.

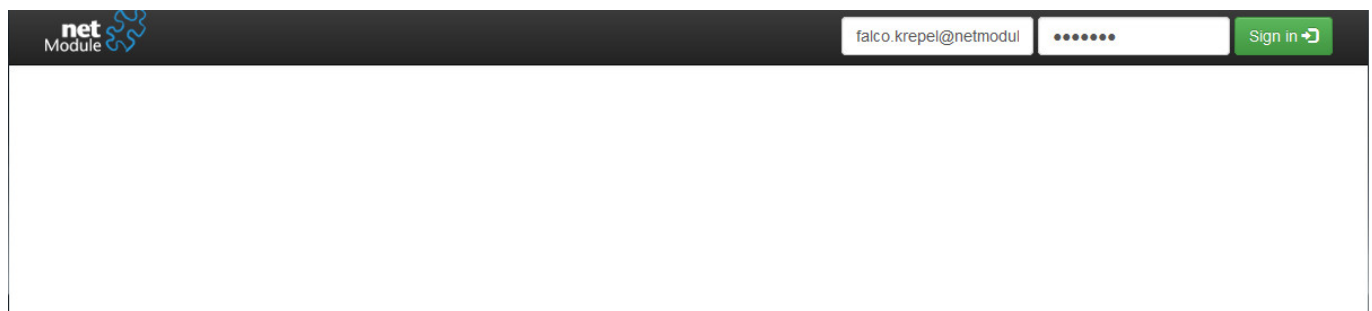

4. Choose a secure password for the administrator.

Now you have to wait some time until the installing procedure is generating the secrets and configuration files.

First Usage

Open a Browser Window and call your configured Cloud Switch Domain and login with you configured administrator credentials.
